Technical Information

**Travabon® classic / Travabon® S classic**

**[TRAVABON® / TRAVABON® S]**

Skin Protection

Fat-free skin protection against oily and water-insoluble workplace substances. Make it easier to clean your skin after contact with heavy-duty contamination.

**Description**

Travabon® classic/Travabon® S classic contain a high proportion of the inorganic solid talc, which forms a physical protective layer on the skin. This protective action has a particularly positive effect where skin comes into contact with organic solvents or substances containing solvents, as well as when working with metal-working oils and glass fibre.

Travabon® classic/Travabon® S classic contain special emulsifiers featuring very good skin compatibility. These emulsifiers act to reduce the ability of water-insoluble substances to cling to the skin, making it easier to clean skin that has been exposed to heavy-duty or very stubborn contamination. Used frequently, the protectant can substantially reduce the amount of strong hand cleansers often needed to remove stubborn ingrained dirt.

**Area of Application**

To protect the skin on hands and arms where there is contact with oily, water-insoluble substances and water-immiscible metal-working oils. To make skin cleansing easier after working with heavy-duty or very stubborn, water-insoluble contamination caused by oil, paint, lacquer, graphite, metallic dust, adhesives and resins, and also after working with dry dust.

Travabon® classic/Travabon® S classic are not designed for use under gloves. There are other, special skin protectants available in the STOKO® Programme for this purpose.

**Product Description**

White-greyish, slightly perfumed, silicone-free, non-oily ointment with high pigment content (suspension).

**Features and Benefits**

<table>
<thead>

</table>
| contains special soil-suspending emulsifiers | • helps to stop stubborn types of dirt clinging to your skin  
• you can quickly and gently clean your skin  
• no longer essential to use special skin cleansers |
| contains a very high proportion of inorganic solids (pigments) | • enhanced protective action when handling oily workplace substances  
• helps to stop dirt clinging to the skin (e.g. resins, lacquers), dermatologically tested |
| silicone-free and non-oily | • no adverse effects when coating surfaces |
| non-oily formulation, with natural film former | • greater safety when handling water-insoluble workplace substances |
| with glycerine and emollient | • active ingredients to support the skin’s natural barrier |
| contains superior quality ingredients | • good skin compatibility  
• minimises the risk of dry skin |
**Instructions for Use**

Wash and dry the skin thoroughly before each application. Then carefully rub Travabon® classic/Travabon® S classic on to the areas of skin at risk, including between the fingers and on the fingernails. Travabon® classic/Travabon® S classic should always be used before starting work, after washing hands and after any lengthy breaks.

To achieve the best results, the dirt should first of all be loosened using just a little water prior to actual cleaning, the skin should then be thoroughly rinsed under running water. Travabon® classic/Travabon® S classic must be applied again after heavy sweating or contact with water.

NB: Using skin care products does not release you from your duty to take the prescribed protective measures.

**Qualitative Composition**

**Travabon® classic**
AQUA (WATER), TALC, SODIUM COCOYL ISETHIONATE, GLYCERIN, SILICA, GLYCERYL STEARATE, LAURETH-10, BENTONITE, XANTHAN GUM, ALGIN, SODIUM PHOSPHATE, PARFUM (FRAGRANCE), LACTIC ACID, POTASSIUM SORBATE, SODIUM SULFOSUCCINATE, SILVER CHLORIDE, PROPYLENE GLYCOL, TITANIUM DIOXIDE.

**Travabon® S classic**
AQUA (WATER), TALC, GLYCERIN, SODIUM COCOYL ISETHIONATE, STEARIC ACID, LAURETH-10, DISTARCH PHOSPHATE, POLYGLYCERYL-2 DIPOLYHYDROXystearate, BENTONITE, ALGIN, XANTHAN GUM, POTASSIUM SORBATE, LACTIC ACID, SODIUM PHOSPHATE, PARFUM (FRAGRANCE), SODIUM ISETHIONATE, DIETHYLHEXYL, SODIUM SULFOSUCCINATE, SILVER CHLORIDE, PROPYLENE GLYCOL, TITANIUM DIOXIDE.

The ingredient declarations used are in compliance with the International Nomenclature of Cosmetic Ingredients (INCI).

**Efficacy Tests**

In a test model developed by W. Gehring (Dermatological Clinic, Karlsruhe), it was demonstrated that a product of the type Travabon® classic/Travabon® S classic provided protection against the solvent toluene, the standard irritant used.

![Illustration 1: cross sections of skin after being treated with toluene for 90 minutes: large blisters appear below the epidermis of the unprotected skin and result in the epidermis and dermis becoming detached (a). No skin damage can be seen to the skin protected by a product of the type Travabon® classic/Travabon® S classic; the condition of the skin is normal (b).](image)

The greater ease of skin cleansing has been demonstrated in practical application tests specifically designed for this purpose (Research & Development, Evonik Industries AG, Krefeld), and in field studies as well.
Skin Compatibility Tests

Travabon® classic/Travabon® S classic are proven to have good skin compatibility properties in human-experimental tests and in practical use. Medically certified skin compatibility expert reports prepared by Prof. Dr. med. S. W. Wassilew, MD for Dermatology, Allergology, Environmental Medicine, are available upon request.

Statutory Regulations

Travabon® classic/Travabon® S classic are governed by the Cosmetics Regulation of the EC, and is not subject to the Chemicals Act or the Ordinance Regulating Hazardous Substances.

Safety Data Sheet

Quality Assurance

All of our products meet the bacterial purity standards as they apply to medicines for external use (as defined by Ph. Eur.).

< 10² reproducible germs / g product.

Verification tests in this respect are a regular feature of our quality assurance procedures.

Storage Information

Travabon® classic/Travabon® S classic can be stored in an unopened container at room temperature for more than 30 months. Shelf life after opening: see indication on packaging.

First Aid

In the event of accidental eye contact with the product, rinse out using water (eye douche, eye irrigation bottle). Consult a doctor if any burning sensation persists.

Additional Information

Expert reports and certificates are available upon request.

Packaging Sizes

Travabon® classic
20 ml tube
100 ml tube

Travabon® S classic
1000 ml soft bottle (for all Stoko Vario® dispensers)

Please note that for reasons of trademark protection, only soft bottles from the STOKO® Programme may be used in these dispensers.
